# SANDWICH MOUNTING SYSTEM

---

**SANDWICH MOUNTING SYSTEM** is an engineered solution for mounting windows and doors in sandwich panels.

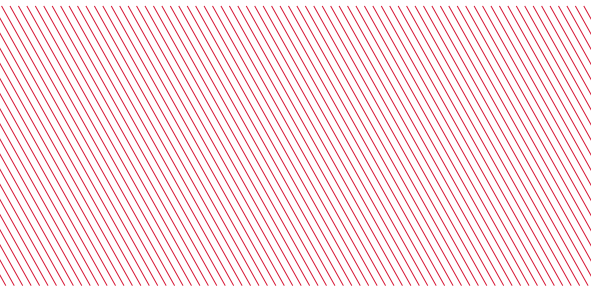

## system features

- system consisting of aluminium profiles enabling the installation and easy mounting of various types of windows and doors from the Aliplast systems (Genesis 75, Superial, Imperial, Star) in facilities made of various types of sandwich panels with a thickness of 60 to 250 mm
- simple design and easy assembly / snapping of mounting angle sections and masking profiles in special hook strips /
- specially designed frame covering the edges of the sandwich panel after inserting a window or door to eliminate the need for additional finishing, making flashings (near the sill and wall) both from the outside and from the inside of the building
- installation of windows and doors without screws, rivets, which enhances the final aesthetics of the building
- system featuring ease of installation and simple design / snapping of mounting angle sections and masking profiles in special hook strips
- system dedicated to industrial and commercial structures / e.g. production halls, warehouses /
